F900

FIREFIGHTER HELMET

F900 helmet with faceshield

F900 helmet with optional rank markings

F900 helmet compatible with leading makes of SCABA

F900 helmet with faceshield, faceshield cover and optional neck curtain

F900 helmet with optional torch and torch bracket

The new Cromwell F900 firefighter helmet provides increased standards of protection and comfort, combined with the advantage of minimising servicing and repair costs.

The modular design of the helmet enables the user to select a model which best meets their operational requirements, and extends service life with easily replaced components.

Developed from the Cromwell F600 helmet, which is used by Fire Services throughout the UK and internationally, the Cromwell F900 will continue to provide the levels of protection and comfort required by the 21st Century firefighter.

The Cromwell F900 has been certificated to EN 443:2008 and most importantly offers a polyphenylsulfone (PPSU) faceshield that is certificated to the high energy impact requirement of EN 14458:2004

- Easily replaced cover assembly protects faceshield and the front of the helmet where most damage occurs
- Compatible with leading international breathing apparatus
- Impact liner also provides thermal stress protection
- Simple rapid 4 point adjustment to fit head sizes 52cm – 65cm
- Available in choice of colours: yellow, white, red, orange, green, blue, black, and photoluminescent
- Helmet shape enables communications headsets to be worn, and the use of mobile phones.
- Helmet construction gives long service life and availability of modular components during servicing reduces operational costs

A SPECIFICATION THAT GIVES OPERATIONAL ADVANTAGES AND SUPERIOR PERFORMANCE FOR THE INTERNATIONAL FIREFIGHTER

Faceshield cover protects the most vulnerable area of the helmet and is easily replaced if damaged

Generously padded browband for optimum comfort

High energy impact resistant polyphenylsulfone (PPSU) faceshield with anti-abrasion protective coating

Wide contour, optically correct faceshield for protection and no distortion of vision

Flame retardant quick release chinstrap

Rank marking and reflective tape options

Internal liner absorbs impact and deflects heat providing a comfortable insulation barrier

One size shell moulded from pre-impregnated glass fibre treated with fire retardant paint finish

Lightweight helmet for optimum comfort

Can be fitted with detachable, heat-resistant, machine washable neck curtain

FACESHIELD

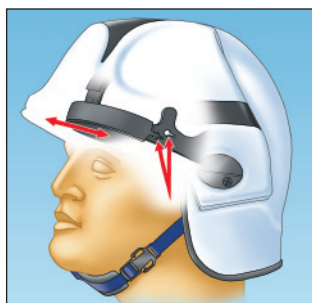

Approved to BSEN 14458:2004, Class 2 optical, high impact energy against high speed particles, and protection against molten metals and hot solids

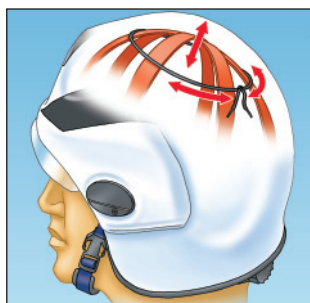

HELMET SYSTEM

Approved to BSEN 443:2008 and the requirements of the PPE regulations, and including shock absorption and resistance to penetration at -30C

Simple rapid 4 point adjustment for the perfect fit

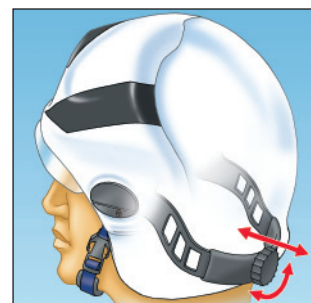

1 Helmet can be moved forwards or backwards on the head by positioning the browband

2 Wearing height adjusted by tightening or slackening the headband harness

3 Angle of helmet adjusted by pivoting browband (also provides BA facemask compatibility)

4 Ratchet adjustment at rear of headband for optimum comfortable fit – 52-65 cms

CROMWELL®

ER1 EMERGENCY AND RESCUE HELMET

ER1 helmet with integral eye guard

The Cromwell ER1 helmet range meets the demand for the increased protection of personnel involved in a wide range of fire, emergency response, civil defence, and rescue operations including:

- Road traffic accidents
- Wildland fire fighting
- CBRN incidents
- Urban search and rescue
- Ambulance / paramedic response
- Police and public security
- Confined space rescue
- Water / mountain rescue
- Helideck and airborne SAR
- Coastguard and marine rescue

Choice of colours for all emergency services

Low profile for confined space access

- Lightweight, less than 800 grms
- Comfortable with simple one size fit headband adjustment
- Polycarbonate eye guard with optional anti-scratch/mist coating
- CE certification for helmet and eye guard
- ER1(3) version available for use with CBRN protective clothing and respirator
- Suitable for non structural firefighting such as wildland, heath and bush fires
- Simple rapid four point adjustment for the perfect fit

Integrates with protective clothing & equipment
